# **Zlinx Wireless I/O** Peer-to-Peer and Modbus I/O

- ✓ Modular, Customizable Wire Replacement
- ✓ 128 / 256 Bit AES Encryption
- ✓ Software Selectable RF Transmit Power
- ✓ Software Selectable Over-the-air Data Rate
- ✓ Modbus ASCII /RTU Compatible
- ✓ Wide Operating Temperature
- ✓ Active Repeater Functionality
- ✓ 10 to 40 VDC & 24 VAC Input Power

Zlinx<sup>™</sup> Wireless Modbus I/O - flexible enough to fit your applications. These plug-n-play units from B&B Electronics combine traditional Modbus RTU remote analog and discrete I/O with built-in wireless connectivity. Wireless RTU serves as Modbus slave RTU in radio-based SCADA systems, or as a peer-to-peer communication platform.

Three Ranges Available - Short, Medium, Long range. Active Repeaters - With built-in repeater functionality on -MR and 900 MHz -LR models, you can ensure vital signals get through.

Modular - Just snap on your I/O and you're ready to go. Wide Temperature - Meets most indoor or outdoor applications. Rugged circuitry prevents signal degradation.

128 / 256 Bit AES Encryption – Secures your data.

**Selectable RF Transmit Power** – Allows you to optimize the transmitter power for your application.

Selectable Over-the-air Data Rate - Allows you to decrease the

OTA Data Rate on –LR and –LR-AU versions, effectively increasing the radio transmitter's range.

**Exception Reporting** – In Modbus mode, allows the reporting of possible problems with connected devices.

**Fail Safe** – Allows you to set your I/O to a safe state in the event of a communications failure.

**Calibration** – Calculates correction factors to make I/O values better match your sensor.

**Communications Failure Alarm** – Allows the first DO to be configured as a COM failure alarm indicator.

**Invert Output** – You can invert the logic of all DO's in peer-to-peer mode.

Monitor – You can use the Zlinx<sup>™</sup> Manager Software to monitor your I/O.

#### Wire Replacement (Peer-to-Peer Mode)

Replicate any analog or digital signal from a remote location-Wirelessly! Use a pair of Zlinx™ Wireless I/O modules to read sensor inputs or control actuators in hard-top-reach locations. Inputs and outputs of the paired Zlinx radios will mirror each other, making it easy to add wireless I/O to any application.

#### Modbus Peer-to-peer or Peer to Multi-peer

Seamlessly add wireless I/O to any Modbus application. Modbus is the most widely supported I/O protocol worldwide. With Zlinx Wireless I/O you can now bring wireless remote I/O into any Modbus system. Simply connect a Zlinx modem to and RS-232 or RS-485 port of the Modbus master and it can now poll up to 150 wireless I/O nodes – each node can be configured for 8 to 48 I/O points.

 Description

 ZZ-PROG1-USB
 Programming Module (USB Interface), USB cable and Software CD

 Note: The Software CD is only available with the programming kit. Software and Firmware can also be downloaded at www.bb-elec.com

## **Specifications**

	Digital Inputs		outs and Outputs
Voltage Range:	0 to 48 VDC	Ranges:	0 to 10 VDC or 0 to 20 mA
Low Voltage (0):	0.8 V maximum		ZZ-4AO-2 is an active current
High Voltage (1):	4.0 V minimum		source. All others are passive
Pull Up Current:	38 micro-amps	Resolution:	12 Bit
Frequency Input:	2 DI inputs per module	Input Accuracy:	0.2% full scale reading typical
requency input.	Software selectable as	Output Accuracy:	0.27% full scale reading typical
	frequency counters,	AI Load Resistance:	100 Mega Ohms when
	0 to 5 KHz range.		configured for voltage input
	Digital Outputs		250 Ohms when configured
Voltage Range:	10 to 40 VDC (Sourcing)		for current input
	0 to 48 VDC (Sinking)	AO Max Output Current:	1 mA when configured for
	40 mA per output	·	voltage output.
	- 11	AO Max Load	450 Ohms when configured
			For current output @ 12V
	Relay Outputs		D Inputs
Number of Relays:	8	Number of RTD:	4
Туре:	C -normally open & normally closed	Wire Configuration:	2, 3, and 4 wire
Output Connection:	3.5mm removable terminal block	Type:	PT100, PT1000 (Optimized for
	(2 per output)	7F	temperature coefficient of 385 C)
Common Connection:	3.5mm removable terminal block		Cu10 (Optimized for temperature
Ratings:	250VAC @ 8A, 30VDC @5A (maximum		coefficient of 427 C)
ixauiyə.	per bank of 4 as grouped on the label)	Input Connection	3.5mm removable terminal block
	per park of 4 as grouped on the label)	Input Connection:	
		<b>T</b> ( <b>D</b>	(4 per output)
